

ANESS RAHMANI

Frontend Developer | React | Next.js | Angular | TypeScript

d.rahmanianess@gmail.com • (+213) 669 23 13 86 • github.com/anness793 • [LinkedIn](#)

Frontend developer specializing in React and Next.js, building performant, accessible, and type-safe web interfaces. Delivered client-facing UIs, a real-time monitoring dashboard, and a full e-commerce frontend using the App Router, server components, and modern data-fetching patterns. Comfortable owning a UI from design system to deployment. Trilingual: Arabic (native), English (C2), French (B2-C1).

TECHNICAL SKILLS

Core: React, Next.js (App Router, Server Components, SSR/SSG/ISR), Angular, TypeScript, JavaScript (ES6+)

Styling: Tailwind CSS, CSS3, responsive/mobile-first design, shadcn/ui, Framer Motion

State & Data: TanStack Query (React Query), Zustand/Context API, REST integration, WebSocket, form handling (React Hook Form + Zod)

Testing & Quality: Jest, React Testing Library, ESLint, Prettier

Performance & SEO: Core Web Vitals, image/font optimization, code-splitting, metadata/SEO basics

Backend (working knowledge): FastAPI, Node.js/Express, PostgreSQL, JWT/OAuth2 auth integration, MongoDB

Tools & Deployment: Git, GitHub, Vercel, Docker, Postman, Render.

Languages: Arabic (native), English (C2), French (B2-C1)

PROJECTS

E-Commerce Platform — Frontend | *Next.js · TypeScript · Tailwind CSS · TanStack Query* | 2026

- Built the storefront and checkout flow with Next.js App Router, using server components for product listing pages and client components for cart/checkout interactivity
- Integrated JWT/OAuth2 authentication (Google sign-in) against a FastAPI backend, with protected routes and role-based UI rendering
- Used TanStack Query for server-state caching and optimistic updates on cart actions; React Hook Form + Zod for validated checkout forms
- Styled with Tailwind CSS and shadcn/ui components. responsive layout tested across mobile/tablet/desktop breakpoints
- Deployed on Vercel with environment-based config to talk to a Dockerized FastAPI backend on Render

AcciSense — Real-Time Accident Detection Platform | *React · Vite · WebSocket · react-i18next* | 2025 – 2026

- Built the operator-facing dashboard with React/Vite, consuming real-time detection events over WebSocket for live incident updates
- Implemented React Router navigation and full French localization via react-i18next; part of a Master's thesis platform defended at 19.5/20

Harbor Fish Log — Client Delivery | *React · FastAPI · MongoDB* | 2025

- Delivered a mobile-optimized field logging interface for a PhD researcher; a full species record (name, location, weight, photo) logs in under 30 seconds
- Built with a minimal, touch-friendly UI for outdoor fieldwork use on tablets, with instant search/filter and CSV/JSON export

IoT Device Monitoring Dashboard | *React · FastAPI · MQTT* | 2023

- Built a real-time dashboard consuming MQTT device data streams via a FastAPI backend, with live chart updates

EXPERIENCE

Web Developer | Freelance Client | 2025 | Remote

- Designed, built, and delivered Harbor Fish Log end-to-end, from requirements gathering through deployment, for a doctoral researcher

Data Annotation Specialist | Freelance (Upwork / LinkedIn) | 2022 – 2024 | Remote

- Completed data cleaning, annotation, and proofreading contracts for research and commercial clients

IT Department Head | University Club | 2021 – 2023 | Khemis Miliana

- Led technical initiatives and managed digital infrastructure for the organization

EDUCATION

Master's Degree in Telecommunication Systems | Université Djilali Bounaama | 2024 – 2026 | Algeria

- Thesis: Automatic Road Accident Detection and Severity Estimation Using Deep Learning Models — 19.5/20

Bachelor's Degree in Electrical Engineering | **Université Djilali Bounaama** | 2020 – 2023 | Algeria
